

**MUNICIPALITY**

Sant Cugat del Vallès

**NAME OF THE PROJECT**

ESADE Creapolis

**HEADLINE**

*On 23 January 2007 the ESADE Creapolis project was presented in Sant Cugat*

**DESCRIPTION OF PROJECT**

ESADE Creapolis has been configured as a new-generation creativity park, an evolution of the technology parks of the 1970s and the science parks of the 1990s.

The aim of the new campus is to provide a pioneering response to the new generation of innovation, development and progress being faced by the global economy. Creapolis is constituted as a habitat for detecting opportunities, defining new solutions, attracting “young and unproven” business projects that provide new focuses, relating with a global network and accessing quality resources.

ESADE Creapolis will spur the development of new initiatives in emerging sectors and will bring together business managers, entrepreneurs, teachers and students from all over the world, scientists, technical and creative experts to share ideas, projects and concerns.

The facilities, situated on lands of the current Borja Centre, will be up and running in the 2007-2008 academic year. The current ESADE Degree course in Business Management and Administration will move to the campus's academic area. The campus will also feature a university residence, a club residence, a centre for creativity and the Creapolis building, designed to house a business centre, a science-business incubator and spaces for innovative companies.

**MAJOR ECONOMIC AND TECHNICAL DETAILS**

- Total surface area of the park: 46,600 m<sup>2</sup>
  - University area: 19,800 m<sup>2</sup>
  - Business area: 26,800 m<sup>2</sup>
- Investment: €70 M
